Living a Healthy Lifestyle

Nutrition and Food

1 Balance your meals. Have protein, healthy carbohydrate, fat and vegetables and/fruit at each meal.

2 Healthy Carbohydrates include brown rice, whole wheat breads, pastas and crackers, starchy vegetables like sweet potatoes, parsnips and potatoes, quinoa, millet, amaranth.

3 Eat three meals plus snacks. Eating three meals plus snacks ensures that you will eat on a schedule and get enough calories and nutrients. The metabolism functions best on a similar schedule daily. Eating every 4-5 hours guarantees plenty of energy and an efficient metabolism.

4 Snacks are important if you get hungry in between meals. They consist of a protein and/or fat + a carbohydrate (refer to snacking handout). Snacks keep your energy going until meal time and reduce your chances of over eating at meals.

5 Proportion your plate to visually have about $\frac{1}{2}$ vegetables and/or fruit, $\frac{1}{4}$ protein, $\frac{1}{4}$ healthy carbohydrate and some fat at each meal.

Body Maintenance: Be nice to your body and pay attention to what it needs

Eat enough every day - not eating enough tells your body to conserve calories and energy, and so the next time you eat more of the energy will be retained rather than being properly used.

Hydrate - Dehydration makes you feel tired. Caffeine and alcohol are very dehydrating. Balance caffeine or alcohol consumption with non-caffeinated, non-alcoholic fluids.

Sleep - Sleep deprivation increases appetite (and often body weight) and decreases brain function. So proper sleep helps your energy, weight maintenance and your ability to think and concentrate.

Exercise - Try to exercise at least 30 minutes a day, three times a week – it can even be split up into 10 minute walks. The effects of brief physical exertion last much longer than those of caffeine, and exercise decreases stress rather than increasing it! Finding a physical activity that you really like to do will make exercise more fun and something to look forward to as well as help to keep you healthy throughout life. So try something new or something that has always appealed to you.

How do I look?

If we all looked the same the world would be a very boring place.

Genes (not jeans) have a lot to do with body shape - there is no "right" weight for someone of a certain height. If you are eating and acting healthily, your weight is probably fine.

Shaped like a pear? Fat around the hips, butt, and thighs is usually estrogen dependent, meaning that it doesn't go away through exercise and healthy nutrition. Torso fat, on the other hand, is associated with poor health.

Repeated dieting can actually lower metabolism and thus make your body retain more of what you put into it. Increasing exercise while not giving your body more food to compensate can also increase body fat storage. Dieting also increases heart disease risk, when compared to simply gaining a little weight. If you really need to lose weight, the most effective way is to increase exercise and cutting only a little food, while concentrating on fruits, veggies, and high fiber foods.

KEWANGAN

Menurut Perspektif Islam

Menurut ruang lingkup Islam, **harta dan kewangan** merupakan **alat** untuk menjamin kelangsungan hidup di dunia. Kehidupan dunia perlu dijalani dengan penuh **hemah** dan **tanggungjawab** untuk mencapai matlamat akhirat.

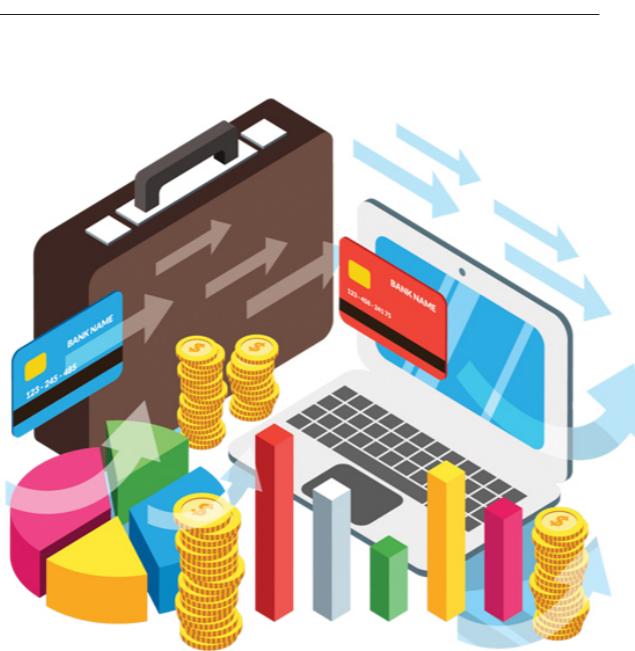

Oleh itu, **pengurusan yang baik**, dapat menjamin kelangsungan hidup manusia dan seterusnya memperolehi **keberkatan** dan **rahmat**.

Di samping keperluan dunia, **matlamat utama** yang ingin dicapai sudah tentulah **kejayaan akhirat** yang abadi.

Begitu juga harta dan kewangan adalah pemangkin kepada kejayaan ini. Maka, pengurusan harta yang bermatlamat dan mengikut kehendak syarak, akan memandu perjalanan syarikat dengan lebih baik dan mengikut acuan Islam, seterusnya mencapai matlamat redha dan rahmat Allah SWT.

KEBERKATAN bermaksud mendapat restu, keredaan atau rahmat dari Allah SWT. Bagi mendapat keberkatan dan rahmat tersebut, sewajarnya kita mematuhi serta mentaati setiap perintah Allah.

Namun keberkatan boleh hilang jika melakukan perkara yang menyalahi apa yang digariskan oleh Allah SWT seperti terlibat dengan riba dan melakukan dosa serta mengabaikan solat.

2 ASPEK UTAMA

dalam mengurus harta/kewangan

1. Bagaimana harta diperolehi.

Ia mestilah menerusi kaedah pemilikan yang sah dan jual beli, pelaburan secara Islam, hadiah dan sebagainya.

2. Bagaimana harta dibelanjakan.

sama ada untuk kebaikan ataupun untuk perkara-perkara yang dilarang Allah.

"Tidak akan berganjak kedua kaki seorang hamba pada Hari Kiamat sehingga ditanya tentang 4 perkara : Tentang usianya pada apa dihabiskan -nya, tentang masa mudanya dan apa yang diperjuangkannya, tentang hartanya dari mana datangnya dan ke mana telah dibelanjakannya dan tentang ilmunya apa yang telah dibuatnya" (**HR at-Tirmidzi**)

5 KONSEP

PENGURUSAN HARTA SECARA ISLAM

Penghasilan Harta (Wealth Creation)

Islam menggalakkan umatnya mencari harta dan tidak hanya pasrah pada qada' dan qadar

Pengumpulan Harta (Wealth Accumulation)

Pengembangan harta boleh dilakukan melalui simpanan dan pelaburan di institusi kewangan

Perlindungan Harta (Wealth Protection)

Harta juga harus dijaga daripada musibah dan perkara-perkara yang tidak diingini

Pengagihan Harta (Wealth Distribution)

Antara instrumen perancangan harta adalah wakaf, wasiat, hibah dan sebagainya.

Penyucian Harta (Wealth Cleansing)

Setiap harta ada hak-hak yang tertentu untuk dibahagikan seperti berzakat dan amal jariah kita seperti sedekah
